

For immediate release:

PACE CE Approval Program Ready for Applications

Thanks to the hard work of multiple PACE Committee members, Review Team participants, FCLB Board members, regulatory board members, state associations, and outside experts and consultants, the Providers of Approved Continuing Education (PACE) program will begin accepting applications for approval the week of January 16, 2006.

PACE is designed to streamline the approval process for jurisdictional CE relicensure credits for chiropractic. CE credits are currently required for relicensure in 50 U.S. jurisdictions, Canada, and a number of other countries.

The online application allows CE providers to apply to chiropractic licensing boards for relicensure credit approval with a single application and fee, under uniform standards developed jointly by boards and experts in post-graduate education.

To learn more, or to apply for PACE approval, please visit www.fclb.org and download the PACE *Policies & Procedures* and *Criteria*, and link to the online PACE approval application.
